Você já parou para pensar em como criamos nossas melhores memórias?

Já pensou nas origens de nossas lembranças mais felizes? O cheiro do café coado, a imagem dos filmes das sessões da tarde; os momentos compartilhados na casa dos avós, das tias, dos amigos. As memórias formadas lá atrás constroem nossas referências de hoje e como enxergamos a vida.

A expectativa do cãozinho que nos espera voltar para casa, o cheiro da comida sendo preparada, a risada das crianças. Tudo nos transporta àquele tempo e espaço dos momentos mais gratificantes: as portas e janelas que dão as boas-vindas à luz; as plantas e jardins que acolhem a chuva; as louças e as mesas que hospedam as cores... E as músicas que nos ensinam sobre as infinitas possibilidades de suas notas?

O aconchego de um abraço, o sorriso largo e verdadeiro, o amor entre irmãos. Somos a mistura de tudo que vivemos, dos lugares que frequentamos, das pessoas que gostamos.

Nossas recordações são construídas pelos cheiros, pelos sons, pelas texturas, pelo tempo, pela luz. O familiar nos conforta, o conhecido nos acolhe.

Como nos movemos no tempo, como o tempo se move através de nós, como mudamos e seguimos mudando e voltamos a ser os mesmos, voltamos às nossas **ORIGENS**.
